Professional Summary

Innovative and results-oriented Senior Frontend Developer with 4 years of proven experience in designing and delivering scalable, user-centric web applications using React, Next.js. Demonstrated expertise in building modular architectures, optimizing performance through lazy loading, code splitting, and responsive design, and implementing best practices for UI/UX and accessibility. Skilled at collaborating with cross-functional teams to align technology solutions with business objectives and enhance user engagement. Passionate about driving front-end excellence and maintaining clean, maintainable codebases.

Core Competencies

Performance Optimization, UI/UX Enhancement, Agile Development, API Integration, User Accessibility, Team Collaboration, Responsive Design, Cross-Browser Compatibility, Modular Architecture, State Management (Redux, Zustand), and RESTful APIs.

Achievements

- **Reduced content publishing time by ~80%** by building a **Directus + Next.js headless CMS** with **reusable, JSON-driven components**.
- **Improved page load performance by ~35%** using **lazy loading, caching, and optimized data fetching**, boosting **Core Web Vitals**.
- **Implemented secure JWT-based RBAC** supporting **multi-level admins** enabling scalable content operations

Technical Skills

- **Frontend:** React.js, Next.js, Angular, JavaScript (ES6+), HTML, CSS, TypeScript, Bootstrap
- **Backend:** Node.js, Express.js, Firebase, MongoDB, REST APIs
- **Tools:** Git, Bitbucket, Jira, Redux, Directus, (AEM – Fundamentals, Headless-CMS), npm, AWS
- **Practices:** Responsive Design, Lazy Loading, Code Splitting, Accessibility (WCAG), Modular Architecture, DSA Basics, Jest, React Testing Library (basic unit & component testing)

Work Experience

Software Development Engineer
Infinity learn

Sep 2022 - present
Hyderabad, India

- **Architected a headless CMS platform** using **Directus + Next.js**, enabling **real-time content management**, faster publishing, and scalable page creation across the company website.
- **Implemented a robust multi-role permission system (Super Admin, City Head, Centre Head) with granular RBAC**, ensuring secure access control and operational efficiency.
- **Designed and maintained dual environments (Preprod/Prod)** with a **manual sync mechanism**, allowing safe content validation before production releases.
- **Improved page load performance by ~35%** through **optimized data fetching, caching strategies, code splitting, and lazy loading**, significantly enhancing user experience.
- Familiar with **AEM components**, templates, and **headless content delivery**, with strong understanding of **CMS architecture**.

- **Developed a scalable Admin Dashboard** using **React, Redux, Context API and Material UI**, streamlining management of **users, schools, centres, and permissions**.
- **Integrated secure JWT-based authentication and role-based authorization**, strengthening application security and session handling.
- **Built interactive learning modules and real-time assessments for Grades 6–12 (CBSE, JEE, NEET)** using **Angular**, supporting live classes, test series, and doubt-resolution workflows.
- **Collaborated closely with UI/UX designers, backend engineers, product, and content teams**, improving feature adoption, platform usability, and overall learner satisfaction.
- **Developed and maintained** backend services using **Node.js** and **Express.js** for real-time chat and music streaming applications, implementing **RESTful APIs, JWT authentication, user management, and secure session handling**.
- **Built** scalable **backend functionalities** including real-time messaging, media management, role-based access control, **analytics APIs**, and **Firebase/MongoDB** integrations, improving application responsiveness and data flow efficiency.

Projects

Chat Sphere - Real-time Chatting Application (Mobile version in progress)

[\[Link\]](#) | [code](#)

- Built a **real-time chat platform** using **React (Vite), Firebase, and Zustand** for state management, supporting **sign-in/sign-up, Reset password**, and image/file sharing.
- Integrated features like **friend requests, blocking/unblocking, and profile customization** with smooth UI animations.
- Used **Firebase Real-time Database** to sync chat data instantly across users.

Spotify Clone - Stream Your Favourite Music

[\[Link\]](#) | [code](#)

- Developed a full-featured **Spotify-like music streaming app** using the **MERN stack**, with seamless playback controls, volume adjustment, and navigation.
- Implemented **JWT-based authentication** with secure login, real-time chat between users, and **admin dashboard** for managing songs and albums.
- Added **user activity tracking** to show current listening status, with an analytics dashboard for usage insights. Enhanced UX with **search, filters, and query-based API calls** for dynamic content delivery.

Nxt Watch - YouTube Clone Application

[\[Link\]](#)

- Created a **YouTube-like video streaming app** with features like **Trending, Gaming, and Saved Videos** tabs.
- Integrated **Light/Dark mode toggle**, search functionality, and **protected routes** using **React Router**.
- Authenticated users with secure login (JWT), maintaining session persistence.
- Authenticated users with **username (rahul)** and **password (rahul@2021)** via HTTP API calls.

Education

Nxtwave Disruptive Technologies

(Feb 2022 – July 2022)

- Industry Ready Certification in Full-Stack Development

Vikas Group of Institutions, Vijayawada

(June 2017 – Aug 2021)

- B.Tech in Mechanical Engineering (CGPA: 7.8)
